

WASEEM ALMAZRUA

Data Scientist | Machine Learning Engineer | Computer Vision | MLOps
waseeme900@gmail.com | +966 555 056 252 | Riyadh, Saudi Arabia | [LinkedIn](#) | [GitHub](#) | [Website](#)

SUMMARY

Data Scientist and ML Engineer with a clinical background, specializing in medical AI, computer vision, and NLP. Experienced in building and deploying end-to-end AI systems across healthcare and cross-industry applications, with strong MLOps practices including CI/CD, experiment tracking, and containerized cloud deployment.

SKILLS

Languages:	Python, SQL
Libraries:	pandas, NumPy, scikit-learn, Matplotlib, TensorFlow, Keras, PyTorch, OpenCV, transformers, MONAI, Pydantic
Frameworks:	FastAPI, Pydantic AI
Tools:	Docker, MLflow, BentoML, CI/CD, Linux, Git, Power BI, PostgreSQL
Platforms:	Google Cloud, GitHub, DigitalOcean, Hugging Face
Domains:	Computer Vision, Deep Learning, Medical Image Analysis, Healthcare Analytics, MLOps, Model Monitoring, NLP, LLM Integration, EDA, Feature Engineering

EXPERIENCE

Staff Nurse — Surgical Unit

Oct 2022 – Oct 2024

King Fahad Medical City (KFMC) | Riyadh, Saudi Arabia

- Delivered patient-centered surgical care, contributed to quality improvement initiatives, and supported clinical data collection for outcome tracking.

PROJECTS

Doctor Copilot — Advanced Brain MRI Segmentation AI [Link](#)

2025

- Deployed Double U-Net + ResNet50 model for brain MRI segmentation achieving Dice 0.87 and IoU 0.82, served via FastAPI on Google Cloud Run.

Technologies: Python, TensorFlow, FastAPI, Google Cloud Run, Docker, U-Net, ResNet50

Face Mask Detection System — YOLOv8 [Link](#)

2025

- Built a real-time YOLOv8 system classifying mask compliance (with/without/incorrect) in hospital environments, deployed on Google Cloud Run.

Technologies: YOLOv8, PyTorch, OpenCV, FastAPI, Google Cloud Run

PPE Monitoring System — Computer Vision [Link](#)

2025

- Real-time PPE detection system using deep learning, achieving mAP@0.5 of 94%; supports live video compliance flagging in hospital and industrial settings.

Technologies: Python, PyTorch, YOLO, OpenCV, Deep Learning, Computer Vision

Brats-3D — Brain Tumor Segmentation Platform [Link](#)

2026

- Full-stack medical AI platform for 3D brain MRI segmentation: React + Auth0 frontend, FastAPI + BentoML backend on Google Cloud Run, direct-to-GCS uploads via signed URLs, and automated CI/CD with GitHub Actions.

Technologies: Python, BentoML, FastAPI, React, Google Cloud Run, GCS, Auth0, GitHub Actions, PostgreSQL, Docker

EDUCATION

Bachelor's Degree in Nursing Science

2017 – 2022

Shaqra University | GPA: 4.88 / 5.0

Data Science & AI Bootcamp

Aug – Nov 2025

SDA x Le Wagon — Intensive 12-week program

- Covered Python, SQL, machine learning, deep learning, data engineering, and real-world AI project deployment.

CERTIFICATIONS

Data Analyst Nanodegree — Udacity | AI Programming with Python — Udacity | Programming for Data Science with Python — Udacity | Statistics for Data Analysis — Udacity
